The homozygous hornless Chram was awarded 87 points for the exterior. Chram comes from a successful cow family. His dam, Jiskra Agrochyt P, is the dam of Flop's dam and a half-sister to Tuareg. This family stands out for its excellent fertility, milk yield and low birth weights. Chram is of purely Danish origin. He is from a combination of Snaebum Campari x Hedetoft United x Holm Ulrick x Ostervang Ringo. This is a bull with exceptional growth. Among his greatest strengths are his excellent growth, large body frame and very good prediction of milk yield in his daughters. The growth in maternal effect in his dam is at 129! Chram is a very harmonious bull, he will combine well with daughters of bulls from Ireland and the UK such as Coose Kojack, Coose Jericho, Curaheen Gunshot, Auroch Deuter, etc.

CONFORMATION

PERFORMANCE TEST

weight 120 d	298 kg
weight 210 d.	456 kg
weight 365 d	737 kg
daily gain in test	1584 g
daily g. since birth	1921 g
